Our Solution: Clever DX

Our small "plug-n-play" patented WiFi device and AI-driven platform allow increased agility and precision in decision making compared to traditional maintenance methods. We diagnose 100% of failures and degradation in real-time of each one of the PV modules. Our measurement process does not require production interruptions.

12% Production Increase 70% Cost Reduction

6 Main Benefits

6 benefits that simplify O&M and improve business decisions.

Immediately & in real-time

Risk Reduction

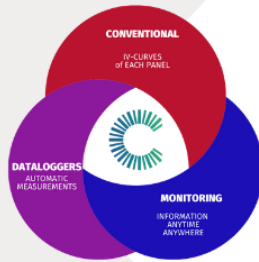

100% of the plant diagnosed

Without interrupting production

vs Competition

Our solution vs manual maintenance & indirect monitoring (eg. drones). We are the only ones that trace the IV Curve of each panel. We know what happens today, we predict what will happen tomorrow.

Game Changer Artificial Intelligence Worldwide

What defines us

Top 3 things about us.

The Team

Together 150 years experience in Tech companies
